

COSC 051: Computer Science I  
Professor: Jeremy Bolton  
Exercise #0: Gain Access to course servers

(1) Download or gain access to an SSH client. You can use this client to gain access to a server remotely. Choose your favorite SSH client, e.g. [www.putty.org](http://www.putty.org)

(2) Open your SSH client and open a secure shell to our course server. You will need to provide the following input

- Our course server (Host Name) is `cs-class.uis.georgetown.edu`
- Port #22 (this is the default)

(3) You will be prompted to enter your netID and password.

(4) Once you have successfully logged in, you should receive a command prompt. Please take a screenshot of the command prompt (just as shown below). Submit this screenshot image as your assignment. Please submit in a standard image format, e.g. .jpg
