In this course you will need to interact with the course server. SSH clients grant you access via a shell, and SFTP clients allow you to transfer files to/from your computer from/to the server. Also note that many SFTP clients also allow for command line access.

To learn how to use this new software application – PLEASE READ – the instructions / manual which is often included in the download or can be found on the corresponding website.

Try download (from a reputable site):

SSH clients (access course server):

- Windows
  - Putty
  - https://www.putty.org/
- Mac
  - Just use your terminal – see corresponding file on site

SFTP or SCP clients for file transfer (your computer to / from the server)
- Windows
  - Bitvise
  - WinSCP
    - https://winscp.net/eng/docs/installation
  - Filezilla
    - https://filezilla-project.org/
- Mac
  - Filezilla
    - https://filezilla-project.org/
